A
PRONOUNCING BIOGRAPHICAL DICTIONARY

CONTAINING MORE THAN

TWELVE THOUSAND NAMES OF NOTEWORTHY PERSONS

WITH

THEIR NATIONALITY, THEIR STATION, THEIR PROFESSION OR OCCUPATION, AND THE DATES OF THEIR BIRTH AND DEATH

THE design of this work of biographical reference is to furnish short answers to the questions most frequently asked concerning any one of the distinguished or notable persons herein mentioned; namely: What is the correct spelling and pronunciation of his name? What was he? What was his nationality? When did he live?

Where two or more members of a family are mentioned, the relationship is stated in italics immediately after the Christian name (as *Son*, *Father*, etc., as the case may be). An assumed name, a sobriquet, or an original name not so well known, is generally printed in italics. The italic words in brackets indicate something noteworthy with which the person has had to do, as a book, a painting, an invention, a discovery, a doctrine, or the like. In many instances what is thus inclosed serves to identify the person clearly.

The mark of interrogation indicates an approximate or a doubtful date.

fl. means flourished *or* lived.

Where two or more persons having the same name are mentioned, the pronunciation is given with the name of the first individual only, if it is the same for each.

The figures sometimes given with the respelling for pronunciation refer to sections in the Guide to Pronunciation.

For special treatment of various sounds in foreign languages, see pp. 2376–2378.

The dates before the Christian Era are denoted by B. C.

A

Aagesen (ô′gē-sĕn), Svend. Earliest Danish historian. Born. Died. 1130— ?

Aali Pasha (ä′lē pä-shä′). Turkish statesman. 1815—1871.

Woods, Leonard. *Son of preceding.* Am. scholar. Pres. Bowdoin College..1807—1878.
Woodward (wŏŏd′wẽrd), Robert Simpson. Am. scientist and educator.....1849—1924.
Woodworth (wŏŏd′wŭrth), Samuel. Am. poet. [*Old Oaken Bucket.*].....1785—1842.
Wool (wŏŏl), John Ellis. American general.....1784—1869.
Woollett (wŏŏl′ĕt), William. English engraver.....1735—1785.
Woolley (-ĭ), Mary Emma. Am. educator. Pres. of Mt. Holyoke College (1900–).....1863 —.
Woolner (wŏŏl′nẽr), Thomas. English sculptor.....1825—1892.
Woolsey (wŏŏl′sĭ), Sarah Chauncey. *Susan Coolidge.* Am. writer, esp. for the young.....1845—1905.
Woolsey, Theodore Dwight. American clergyman and author. President of Yale College (1846–71).....1801—1889.
Woolson (wŏŏl′sŭn), Constance Fenimore. American novelist.....1848—1894.
Wooster (wŏŏs′tẽr), David. American Revolutionary general.....1710—1777.
Worcester (wŏŏs′tẽr), Dean Conant. Am. zoöl. Philippine com'r.....1866—1924.
Worcester, Edward Somerset, Marquis of. English inventor.....1601—1667.
Worcester, Joseph Emerson. American lexicographer.....1784—1865.
Worcester, Noah. American clergyman. [*Massachusetts Peace Society.*]...1758—1837.
Worde, de (dē wŏrd′), Wynkyn. Real name *Jan van Wynkyn.* Alsatian printer in London. Successor to Caxton..... ? —1534?
Wordsworth (wûrdz′wŭrth), Christopher. *Brother of William.* English clergyman, author, and educator.....1774—1846.
Wordsworth, Christopher. *Son of preceding.* English bishop, classical and Biblical scholar, and author.....1807—1885.
Wordsworth, Dorothy. *Sister of William.* English diarist.....1771—1855.
Wordsworth, William. English poet.....1770—1850.
Workman (wûrk′măn), Fanny, born Bullock. *Mrs. W. H. W.* American traveler, explorer, and mountain climber..... ? —1925.
Workman, William Hunter. Am. traveler, explorer, and mountain climber.1847 —.
Wormeley (wûrm′lĭ), Katharine Prescott. Am. translator of Balzac, etc....1829—1908.
Worms (vŏrms), René. French sociologist.....1869 —.
Worth (wûrth), William Jenkins. American general.....1794—1849.
Wotton (wŏt′ŭn), Henry, Sir. Eng. diplomatist, poet, and misc. writer .....1568—1639.
Wouwerman (vou′vẽr-măn), Philips. Dutch painter.....1619—1668.
Wrangel (vräng′ĕl), Karl Gustav, Count. Swedish high admiral, grand marshal, and generalissimo.....1613—1676.
Wrangel, von, Ferdinand Petrovich, Baron. Russian explorer.....1794—1870.
Wratislaw (răt′ĭs-lô), Albert Henry. English writer and divine.....1822—1892.
Wraxall (răks′ôl), Frederic Charles Lascelles, Sir. *Grandson of Sir Nathaniel William.* English author.....1828—1865.
Wraxall, Nathaniel William, Sir. English historical writer.....1751—1831.
Wray (rā), John. See RAY, John.
Wren (rĕn), Christopher, Sir. English architect. [*St. Paul's Cathedral.*] ..1632—1723.
Wright (rīt), Carroll Davidson. American labor statistician and author.....1840—1909.
Wright, Frances. *Mme. D'Arusmont.* Scottish reformer.....1795—1852.
Wright, George Frederick. American geologist, educator, and author.....1838—1921.
Wright, Joseph. English philologist. [*Eng. Dialect Dictionary.*] 1855 —.
Wright, Luke E. American lawyer, administrator, and sec. of war (1908–09).1847—1922.
Wright, Mabel, born Osgood. American author and naturalist.....1858 —.
Wright, Orville. American aëronaut. [*Heavier-than-air flying machine.*]..1871 —.
Wright, Silas. American statesman.....1795—1847.
Wright, Thomas. English antiquary.....1810—1877.
Wright, Wilbur. *Brother of Orville.* American aëronaut.....1867—1912.
Wright, William. British Orientalist, born in India.....1830—1889.
Wright, William Aldis. Eng. ed. [*Globe and Cambridge Shakespeares.*]...1836—1914.
Wrottesley (rŏts′lĭ), John, second Baron. English astronomer.....1798—1867.
Wulfila. See ULFILAS.
Wundt (vŏŏnt), Wilhelm Max. German physiologist and psychologist.....1832—1920.
Wurmser, von (fŏn vŏŏrm′zẽr), Dagobert Siegmund, Count. Austrian gen..1724—1797.
Wurtz (vürts), Charles Adolphe. French chemist.....1817—1884.
Wu Ting Fang (wōō′ tĭng′ fäng′). Chinese diplomat.....1850?-1922.
Wuttke (wŏŏt′kĕ), Heinrich. German historian.....1818—1876.
Wyant (wī′ănt), Alexander H. American landscape painter.....1836—1892.
Wyatt (wī′ăt), Matthew Digby, Sir. Eng. architect and writer on art.....1820—1877.
Wyatt, Richard James. English sculptor.....1795—1850.
Wyatt, Thomas, Sir. English courtier, statesman, and poet.....1503?-1542.
Wycherley (wĭch′ẽr-lĭ), William. English dramatist.....1640?-1716.
Wycliffe, Wiclif, Wyclif, *or* **Wickliffe** (wĭk′lĭf), John. English reformer, theologian, and translator of the Bible..... ? —1384.
Wykeham, *or* **Wickham** (wĭk′ăm), William of. Bishop of Winchester. Lord high chancellor of England.....1324—1404.
Wylie (wī′lĭ), Alexander. English missionary and sinologist.....1815—1887.
Wyman (wī′măn), Jeffries. American comparative anatomist.....1814—1874.
Wyndham (wĭnd′ăm), Charles, Sir. English actor and manager.....1837—1919.
Wyndham, George. English politician and editor.....1863—1913.
Wyndham, William, Sir. English politician.....1687—1740.
Wyss (vĭs), Johann Rudolf. Swiss author. [*Swiss Family Robinson.*].....1781—1830.
Wythe (wĭth), George. American jurist. Signer of Dec. of Independence..1726—1806.
Wyttenbach (vĭt′ĕn-bäk), Daniel. Swiss classical philologist and humanist in Holland.....1746—1820.

X

Xavier (zăv′Ĭ-ẽr ; *Sp. pron.* hä-vyâr′ ; 262), St. **Francis.** *Francisco Javier.* *The Apostle of the Indies.* Spanish Jesuit and missionary.....1506—1552.
Xavier de Menezes (shä-vyâr′ dā mĕ-nā′zĕsh), Francisco. Count of Ericeira. Portuguese general and author.....1673—1744.
Xenocrates (zĕ-nŏk′rȧ-tēz). Greek philosopher.....B. C. 396— 314.
Xenophanes (zĕ-nŏf′ȧ-nēz). Greek philosopher and poet.....fl. B. C. 536.
Xenophon (zĕn′ō-fŏn). Athenian historian and general.....B. C. 434?-355?
Xeres, de (dā hā′rās), Francisco. Sp. secretary to Pizarro and historian.....1500?-1547?
Xerxes (zûrk′sēz). *Xerxes the Great.* King of Persia (B. C. 486-465).....? —B. C. 465.
Ximenes (zĭ-mē′nēz), *Sp.* **Ximénez** (hē-mā′nāth ; 262, 268). See JIMÉNEZ.

Y

Yale (yāl), Elihu. Patron of Yale College.....1648—1721.
Yamagata (yä′mä-gä′tȧ). Prince Yamagata Aritomo. Japanese field marshal and statesman.....1838—1922.
Yancey (yăn′sĭ), William Lowndes. American politician.....1814—1863.
Yarrell (yăr′ĕl), William. British naturalist.....1784—1856.
Yates (yāts), Edmund. English novelist and journalist.....1831—1894.
Yates, William. English missionary at Serampur.....1792—1845.
Yeardley (yērd′lĭ), George, Sir. Governor of Virginia.....1580?-1627.
Yeats (yāts ; yēts), William Butler. Irish author and poet.....1865 ——.
Yendys (yĕn′dĭs), Sydney. Pseudonym of SYDNEY DOBELL.
Yermak. See ERMAK-TIMOFEEVICH.
Yonge (yŭng), Charles Duke. English philologist and author.....1812—1891.
Yonge, Charlotte Mary. English novelist.....1823—1901.
York (yôrk), Edmund Plantagenet, first Duke of. Founder of house of York.1341—1402.
Yoshihito (yō′shē-hē′tō). Personal name of TAI-SHO, emperor of Japan.
Youatt (yōō′ăt), William. English veterinary surgeon.....1776—1847.
Youmans (yōō′mănz), Edward Livingston. American chemist.....1821—1887.
Young (yŭng), Arthur. English agriculturist and writer. [*Travels in France.*].1741—1820.
Young, Brigham. Leader and high priest of the Mormons.....1801—1877.
Young, Charles Augustus. American astronomer.....1834—1908.
Young, Edward. English poet. [*Night Thoughts.*].....1683—1765.
Young, Sidney. English chemist.....1857 ——.
Young, Thomas. English physicist.....1773—1829.
Younghusband (yŭng′hŭz′bănd), Francis Edward, Sir. British explorer and soldier. [*Pamir and Tibet.*].....1863 ——.
Ypsilanti (ĭp′sē-lăn′tē) *or* **Ypsilan'tis,** *Greek* **Ypselantes** (ēp′sē-lán′dēs), Aleksandros, Prince. Greek revolutionary patriot.....1792—1828.
Ypsilanti, Dēmētrios. *Bro. of A.* Roumanian mil. commander.....1793—1832.
Ysaye (ē-zä′yē), Eugène. Belgian violinist.....1858 ——.
Yuan Shih-kai (yōō-än′ shē′-kī′). President of China (1912-1916).....1859—1916.
Yule (yōōl), Henry, Sir. English army officer and author.....1820—1889.
Yung Wing (yōōng′ wĭng′). Chinese educationist.....1828—1912.
Yves (ēv), Saint, *or* **Yves-Hélori** (ēv′-ā′lō′rē′). French monk and jurist...1253—1303.

Z

Zach, von (fŏn tsäx′), Franz Xaver, Baron. German astronomer.....1754—1832.
Zack (zăk). Pseudonym of GWENDOLINE KEATS.
Zalinski (zȧ-lĭn′skĭ), Edmund Louis Gray. American soldier (major) and inventor, born in Prussian Poland. [*Dynamite gun.*].....1849—1909.
Zaluski (zä-lōō′skē), Józef Andrzej. Pol. bibliophile. [*Zaluski Library.*]..1701—1774.
Zamacois (thä′mä-kō′ēs), Eduardo. Spanish genre painter.....1840—1871.
Zamenhof (zä′mĕn-hŏf), Lazarus Ludwig. Inventor of Esperanto, b. in Russia.1859—1917.

Born. Died.

Zamojski, *or* **Zamoyski** (zä-moi′skē), Andrzej, Count. Polish statesman....1716—1792.
Zamojski, Jan. Polish statesman and general.....1541—1605.
Zampieri (tsäm-pyâ′rē), Domenico. See DOMENICHINO.
Zanardelli (dzä′när-dĕl′lä), Giuseppe. Italian jurisconsult and statesman...1826—1903.
Zanella (dzä-nĕl′lä), Giacomo. Italian poet and historian of literature.....1820—1888.
Zangwill (zăng′wĭl), Israel. English Jewish poet and author.....1864 ——.
Zárate, de (dā thä′rä-tā), Agustín. Spanish historian. [*Conquest of Peru.*].1492?-1560?
Zarathustra. See ZOROASTER.
Zea (sā′ä ; thā′ä ; 268), Francisco Antonio. South American statesman, naturalist, and author, born in Colombia.....1770—1822.
Zeeman (zā′măn), Pieter. Dutch physicist. [*Zeeman effect.*].....1865 ——.
Zeisberger (tsīs′bĕr-gĕr), David. Moravian missionary in America.....1721—1808.
Zelaya (sā-lä′yä ; 268), José Santos. Nicaraguan soldier and president (1894-1909).....1853—1919.
Zeller (tsĕl′ĕr), Eduard. German theologian and philosopher.....1814—1908.
Zelter (tsĕl′tĕr), Karl Friedrich. German musical composer.....1758—1832.
Zemp (tsĕmp), Joseph. President of Switzerland.....1834—1908.
Zeno (zē′nō). Greek philosopher. Founder of the Stoic school.....B. C. 336?- 264?
Zeno of Elea. Greek philosopher. [*Dialectics.*].....fl. ab. 475 B. C.
Zeno. *The Isaurian.* Emperor of the East (474-491).....? — 491.
Zeno (dzā′nō), Carlo. *Brother of following.* Grand admiral of Venice.....1338?-1418.
Zeno, Niccolò (?- 1396), and Antonio (? -1406). Two brothers. Venetian navigators.
Zenobia (zē-nō′bĭ-ȧ), Septimia. Queen of Palmyra (267-272).....? —aft. 272.
Zeppelin, von (fŏn tsĕp′ē-lēn′), Ferdinand, Count. German general and aëronaut. [*Air ship.*].....1838—1917.
Zetterstedt (tsĕt′ĕr-shtĕt), Johan Wilhelm. Swedish naturalist.....1785—1874.
Zeuxis (zūk′sĭs). Greek painter. [*Helen.*].....fl. 430 B. C.
Zhukovski (zhōō-kôf′skē), Vasili Andreevich. Russian poet.....1783—1852.
Ziethen, von (fŏn tsē′tĕn), Hans Joachim. Prussian general.....1699—1786.
Zimmermann, von (fŏn tsĭm′ĕr-măn ; *Angl.* zĭm′ĕr-măn), Johann Georg. Swiss physician and philosopher.....1728—1795.
Zimmermann, von (fŏn tsĭm′ĕr-măn), Klemens. German painter.....1789—1869.
Zinzendorf, von (fŏn tsĭn′tsĕn-dôrf), Nikolaus Ludwig, Count. Restorer of the Moravian sect.....1700—1760.
Ziska (zĭs′kȧ), *Boh.* **Žižka** (zhĭsh′kȧ), Ján. Bohemian gen. and Hussite...1360?-1424.
Zlatovratski (zlä′tŏ-vrät′skĭ), Nikolay Nikolaevich. Russian author.....1845 ——.
Zobeidah (zō-bā′dȧ ; zō-bī′-). *Zubeida Khatun.* Wife of Harun-al-Rashid.. 765?- 831.
Zoëga (sō-ā′gȧ), Georg. Danish archæologist. [*Obelisks.*].....1755—1809.
Zola (zō′lȧ ; *F.* zō′lä′), Émile. French naturalistic novelist.....1840—1902.
Zollikofer (tsŏl′ē-kō′fĕr), Georg Joachim. Swiss pulpit orator.....1730—1788.
Zorilla (thō-rē′yä), Manuel Ruiz. Spanish statesman.....1834—1895.
Zoroaster (zō′rō-ăs′tĕr), *or* **Zarathustra** (zä′rȧ-thōōs′trȧ). Founder of the ancient Persian religion.....fl. about 1000 B. C.
Zorrilla y Moral (thō-rē′yä ē mō-räl′), José. Spanish dramatist and poet.1817—1893.
Zrinyi (zrĭ′nyĭ), Niklas, Count. Hungarian general.....1508—1566.
Zschokke (tshŏk′ē), Johann Heinrich Daniel. German author.....1771—1848.
Zuccaro (tsōō-kä′rō), *or* **Zucchero** (tsōō-kā′rō), Federigo. Ital. painter..1543—1609.
Zuccaro, *or* **Zucchero,** Taddeo. *Bro. of Federigo.* Italian painter.....1529—1566.
Zukertort (tsōō′kĕr-tôrt), Johannes Hermann. Polish chess player.....1842—1888.
Zuloaga (sōō-lō-ä′gä ; 268), Félix. Mexican soldier and president.....1814—1876.
Zumbusch, von (fŏn tsōōm′bōōsh), Kaspar. German sculptor.....1830—1915.
Zumpt (tsōōmpt), August Wilhelm. *Nephew of K. G.* German Latinist....1815—1877.
Zumpt, Karl Gottlob. German philologist. [*Latin Grammar.*].....1792—1849.
Zúñiga (thōōn′yē-gä). See ERCILLA Y ZÚÑIGA.
Zurbarán, de (dā thōōr′bä-rän′), Francisco. Spanish painter.....1598—1662.
Zurita (thōō-rē′tä), Jerónimo. Spanish historian.....1512—1580.
Zwinger (tsvĭng′ĕr), Theodore. *The Elder.* Swiss physician.....1533—1588.
Zwingli (*Ger. pron.* tsvĭng′lē), Ulrich *or* Huldereich. (*Lat.* **Zuin'glius.**) Swiss Protestant reformer and patriot.....1484—1531.

ARBITRARY SIGNS

USED IN

WRITING AND PRINTING.

I. ASTRONOMICAL.

1. SUN, GREATER PLANETS, ETC.

⊙ *or* ☉ The Sun; Sunday.
☾ *or* ☽ The Moon; Monday.
● New Moon.
◍, *or* ☽ First Quarter.
○, *or* ☻ Full Moon.
◍, *or* ☾ Last Quarter.
☿ Mercury; Wednesday.
♀ Venus; Friday.
⊕, ⊖, *or* ♁ The Earth.
♂ Mars; Tuesday.
♃ Jupiter; Thursday.
♄ Saturn; Saturday.
♅, *or* ⛢ Uranus.
♆, *or* ♆ Neptune.
☄ Comet.
✳, *or* ✳ Fixed Star.

☞ Of these signs, the following sufficiently explain themselves; *viz.:* ☉, ●, ☽, ○, ☻, ☾, ☄, and ✳. The sign ⊙ represents a buckler with its boss, a natural and appropriate emblem of the sun; ☿, the caduceus of Mercury, or, according to some, his head and winged cap; ♀, a looking-glass, an attribute of Venus; ⊖, the earth and its equator; ⊕, the same, with the addition of a meridian line, or, as some think, the four quarters of the globe; ♁, the globe and cross placed in the hands of sovereigns as a symbol of power or dominion; ♂, the head, helmet, and nodding plume of a warrior, or, more probably, a shield and spear, the two chief instruments of ancient warfare; ♃, a rude and hieroglyphical representation of an eagle, — the "bird of Jove," — with expanded wings, or the initial letter of Ζεύς, the Greek name of Jupiter, with a line drawn through it as a mark of abbreviation; ♄, an ancient scythe or sickle, the emblem of Saturn, the god of time; ♅, the initial letter of *Herschel*, the discoverer of Uranus, with a planet suspended from the crossbar; ⛢, a sign[1] made up of that for the sun [⊙], and a part of that for Mars [♂]; ♆, a trident, the emblem of Neptune, the god of the sea.

[1] Among the old chemists, gold was symbolically represented by the sign ⊙, and iron by ♂. When Uranus was discovered, the German astronomers invented the sign ⛢ to denote not only the new planet, but also the then recently discovered metal platinum, which was at that time called *white gold*, and which, in its native state, is almost always combined with *iron*.

2. ASTEROIDS, OR MINOR PLANETS.

⚳, *or* ⚳ Ceres; ⚴, *or* ⚴ Pallas; ⚵, *or* ⚵ Juno; ⚶, *or* ⚶ Vesta.

☞ These four signs are still occasionally employed; signs devised for the other asteroids have never been much used. All are now commonly designated by numbers indicating the order of their discovery, and their symbol is a small circle or oval inclosing this number; as, ①, Ceres; ②, Pallas; ③, Juno; ④, Vesta; and the like.

3. SIGNS OF THE ZODIAC.

Spring Signs.	1. ♈ Aries, *the Ram.*	Autumn Signs.	7. ♎ Libra, *the Balance.*
	2. ♉ Taurus, *the Bull.*		8. ♏ Scorpio, *the Scorpion.*
	3. ♊ Gemini, *the Twins.*		9. ♐ Sagittarius, *the Archer.*
Summer Signs.	4. ♋ Cancer, *the Crab.*	Winter Signs.	10. ♑ Capricornus, *the Goat.*
	5. ♌ Leo, *the Lion.*		11. ♒ Aquarius, *the Water Bearer.*
	6. ♍ Virgo, *the Virgin.*		12. ♓ Pisces, *the Fishes.*

☞ The sign ♈ represents the horns of a ram; ♉, the head and horns of a bull; ♊, the ancient statues of Castor and Pollux, which consisted of two pieces of wood joined together by two crosspieces; ♋, the claws of a crab; ♌, a corruption of the Greek letter Λ, the initial of Λέων, a lion, or, less probably, a representation of a lion's tail; ♍, a corruption of παρ for παρθένος, the Greek word for *virgin*; ♎, a rude picture of a balance; ♏, the legs and tail of a scorpion, or, according to some, the tail only, including the sting and two or three of the joints nearest to it; ♐, an arrow just leaving the bow, of which a small portion is to be seen at the bottom of the character; ♑, a ligature combining the letters τρ of the Greek word τράγος, a goat; ♒, waves of water; ♓, two fishes tied together with a string.

4. ASPECTS AND NODES.

☌ Conjunction; — indicating that the bodies have the same longitude, or right ascension; as, ☿ ☌ ☉; that is, Mercury is in conjunction with the sun.
⚹ Sextile; — indicating a difference of 60° in longitude, or right ascension.
⚺, *or* ⊙ Quintile; — indicating a difference of 72° in longitude, or right ascension. *Rare.*
□ Quadrature; — indicating a difference of 90° in longitude, or right ascension.
△ Trine; — indicating a difference of 120° in longitude, or right ascension.
☍ Opposition; — indicating a difference of 180° in longitude, or right ascension; as, ☉ ☍ ☽; that is, the sun is in opposition to the moon.
☊ Ascending Node; — called also *dragon's head.* See DRAGON'S HEAD, 2, in *Vocab.*
☋ Descending Node; — called also *dragon's tail.* See DRAGON'S TAIL, 1, in *Vocab.*

☞ In the sign ☌, the circle represents the zodiac, or the heavens, and the little mark at the top the meeting of two bodies in the same point or place; in the sign ☍, the circles touch at points opposite to each other, or 180 degrees apart; the signs ⚹, □, △, are symbolical of the derivation of the words *sextile, quadrature, trine*, from the Latin words *sex*, six, *quattuor*, four, *tres*, three, being figures composed of six, of four, and of three lines respectively; the signs ☊ and ☋ represent a dragon, and originated in the fancy of the ancient astronomers, who saw in the deviation from the ecliptic made by a planet in passing from one node to another a figure like that of a dragon, the belly being where the planet has the greatest latitude, and the head and tail the points of intersection with the ecliptic.

5. SIGNS AND ABBREVIATIONS USED IN NOTATION.

a, *or a* Mean distance.
a, *or* A. R. Right ascension.
β Celestial latitude.
D. Diameter.
δ Declination.
△ Distance.
E. East.
e Eccentricity.
h., *or* ʰ Hours; as, 6h., or 6ʰ.
i Inclination; especially, inclination to the ecliptic.
L, *l*, *or* ε Mean longitude in orbit.
λ Longitude.
M. Mass.
m., *or* ᵐ Minutes of time; as, 6m., or 6ᵐ.
μ, *or n* Mean angular motion in unit of time.
+, *or* N. North.
N. P. D. North polar distance.
ν, ☊, *or* L. Longitude of ascending node.
π *or* ω Longitude of perihelion.
q. Perihelion distance.
ρ, *or* R. Radius, or radius vector.
—, *or* S. South.
s, *or* ˢ Seconds of time; as, 10s., or 10ˢ.
T. Time; periodic time.
W. West.
φ (*a*) Angle of eccentricity, or the angle whose sine is equal to *e*; (*b*) Geographical latitude.
° Degrees.
′ Minutes of arc.
″ Seconds of arc.
☉ Sun's longitude.
☽ Moon's longitude.

II. BOTANICAL.

⚳, ☉, ○, *or* ① An annual plant.
♂, ☉☉, ☽, *or* ② A biennial plant.
♃ A perennial herb.
△ An evergreen plant. [*R.*]
☉ A monocarpous plant; that is, a plant, whether annual or biennial, that flowers but once.
♄ An undershrub, or suffruticose plant.
♄ A shrub.
♄ A large shrub, almost a tree.
♄ A tree.
○ A monocarpous perennial plant.
☃, *or* ♂ A staminate or male flower; also, a plant bearing such flowers.
♀ A pistillate, fertile, or female flower; also, a plant bearing such flowers.
☿ A perfect or hermaphrodite flower; also, a plant bearing such flowers.
☃ ♀ Unisexual; that is, having the male and female flowers separate.
☃ — ♀ Monœcious; that is, having male and female flowers on the same plant.
☃ : ♀ Dicœcious; that is, having male and female flowers on different plants.
♀ ☃ ♀ Polygamous; that is, having hermaphrodite, or perfect, and unisexual flowers on the same or different plants.
⁀ A climbing plant.
) Turning or winding to the left.
(Turning or winding to the right.
○= Having the cotyledons accumbent, and the radicle lateral.
○ || Having the cotyledons incumbent, and the radicle dorsal.
○ » Having the cotyledons conduplicate, and the radicle dorsal.
○|| || Having the cotyledons folded twice, and the radicle dorsal.
○|| || || Having the cotyledons folded thrice, and the radicle dorsal.
∞, *or* 00 An indefinite number; when applied to stamens, more than twenty.
0 Wanting; none; indicating the absence of a part.
° Feet.
′ Inches. ″ Lines. ☞ With European writers, the usual signs for feet, inches, and lines are respectively ′, ″, and ‴.
? indicates doubt or uncertainty respecting that to which it is affixed or prefixed; — applied to the names of genera or species, of localities, of authors cited, and the like.
! indicates certainty; — used as a mark of affirmation or authentication, as of a genus or species, and the opposite or counterpart of ?. When appended to the name of an author, it indicates that the writer has examined an authentic specimen of the plant referred to, and when appended to the name of a locality, that the writer has seen or collected specimens from that locality.
* indicates, when appended to a reference, that a good description is to be found at the place referred to. *Rare.*
† indicates doubt or uncertainty; the same as ?. *Rare.*

III. CHEMICAL.

. One equivalent of oxygen; — written above a symbol representing an element, and repeated to indicate two, three, or more atoms or equivalents; thus, Ḟe denotes a compound of one atom or equivalent of oxygen with one of iron; S̈, a compound of three atoms or equivalents of oxygen with one of sulphur.

' One atom or equivalent of sulphur; — used in the same manner as the preceding; thus, F́e denotes a compound of two atoms or equivalents of sulphur and one of iron.

☞ A dash drawn across a symbol having either of the foregoing signs above it, denotes that two atoms or equivalents of the substance represented by the symbol are joined with the number of atoms or equivalents of oxygen or sulphur indicated by the dots or commas; thus, F̈e represents a compound of two atoms or equivalents of iron and three of oxygen, forming sesquioxide of iron. All the above symbols are now practically obsolete.

+ signifies "and," "together with," and is used between the symbols of substances brought together for a reaction or produced by such reaction. Placed above a symbol or to its right above the line, it signifies a unit charge of positive electricity. Thus, Ca^{++} denotes the ion of calcium, which carries two positive charges. It is sometimes used to indicate, in organic chemistry, a base or alkaloid, when placed above the initial letter of the name of the substance; as, Ṁ, morphine; Q̇, quinine.

— signifies a single "bond," or unit of attractive force or affinity, and is used between the symbols of elements or groups which unite to form a compound; thus, H—Cl for HCl; H—O—H for H_2O; Ca— O for CaO; $Al^{-}(OH)_3$ for $Al(OH)_3$. Placed above a symbol, or to its right above the line, it signifies a unit charge of negative electricity; thus, SO_4^{--} denotes an ion of sulphuric acid, carrying two negative charges. It also indicates, in organic chemistry, an acid, when placed above the initial letter of the name of the acid; as, C̄, citric acid; T̄, tartaric acid. It is also sometimes used as a simple sign of subtraction to indicate the removal of a part from a compound.

′ is frequently used to indicate valence; thus, Fe'' denotes bivalent iron; Fe''', trivalent iron.

· is sometimes used instead of — to indicate a bond; as, H·Cl for H—Cl, CH_2:CH_2 for CH_2=CH_2, etc.

⬡ in organic chemistry, denotes the benzene nucleus.

ψ Pseudo-.

☞ Every elementary substance is represented, in chemical notation, by a symbol consisting of the initial or abbreviation of its Latin or New Latin name: as, H for hydrogen, O for oxygen, Ag (from *Argentum*) for silver, and the like, each symbol when used singly always indicating a single atom of the substance represented by it; thus, O stands for one atom of oxygen, C for a single atom of carbon, and the others in like manner. See ELEMENT, *n.*, 3, in the *Vocab.* A compound body made up of single atoms of its constituents is represented by the two symbols of the respective constituents written side by side; as, HCl, a compound of one atom or equivalent of hydrogen with one of chlorine, forming hydrogen chloride. To express more than one atom or equivalent of a substance, a number is used, either prefixed to the symbol, or, more commonly, written after it, below the line; as, 2O, or O_2, two atoms of oxygen (O_2 signifies that the two atoms are united, forming a molecule, 2O does not).

A compound, as a salt, etc., is indicated by writing the symbols of its constituents one after another; as H_2O, two atoms of hydrogen united to one of oxygen to form water; $CaCO_3$, calcium carbonate; H_2SO_4, sulphuric acid. Sometimes these are written with a comma or a period between the symbols of the original compounds from which they are supposed to be derived; as, CaO,CO_2, calcium carbonate. See also FORMULA, 5, in the *Vocab.*

IV. MATHEMATICAL.

1. NUMERALS, OR NOTATION.

Arabic.	*Greek.*	*Roman.*	
0			Naught.
1	α	I	One.
2	β	II	Two.
3	γ	III	Three.
4	δ	IV *or* IIII	Four.
5	ϵ	V	Five.
6	$\digamma$	VI	Six.
7	ζ	VII	Seven.
8	η	VIII *or* IIX	Eight.
9	θ	IX *or* VIIII	Nine.
10	ι	X	Ten.
11	$\iota\alpha$	XI	Eleven.
12	$\iota\beta$	XII	Twelve.
13	$\iota\gamma$	XIII *or* XIIV	Thirteen.
14	$\iota\delta$	XIV *or* XIIII	Fourteen.
15	$\iota\epsilon$	XV	Fifteen.
16	$\iota\digamma$	XVI	Sixteen.
17	$\iota\zeta$	XVII	Seventeen.
18	$\iota\eta$	XVIII *or* XIIX	Eighteen.
19	$\iota\theta$	XIX *or* XVIIII	Nineteen.
20	κ	XX	Twenty.
30	λ	XXX	Thirty.
40	μ	XL *or* XXXX	Forty.
50	ν	L	Fifty.
60	ξ	LX	Sixty.
70	o	LXX	Seventy.
80	π	LXXX *or* XXC	Eighty.
90	ς	XC *or* LXXXX	Ninety.
100	ρ	C	One hundred.
200	σ	CC	Two hundred.
300	τ	CCC	Three hundred.
400	υ	CCCC	Four hundred.
500	ϕ	D *or* IↃ	Five hundred.
600	χ	DC *or* IↃC	Six hundred.
700	ψ	DCC *or* IↃCC	Seven hundred.
800	ω	DCCC *or* IↃCCC	Eight hundred.
900	$\overline{\pi}$	CM, DCCCC, *or* IↃCCCC	Nine hundred.
1,000	$,\alpha$	M *or* CIↃ	One thousand.
2,000	$,\beta$	MM *or* CIↃCIↃ	Two thousand.
1,000,000			One million.
1,000,000,000			One billion.
1909		MCMIX *or* MDCCCCIX	One thousand nine hundred and nine.

☞ The Arabic numerals are so called because first introduced into Europe by the Arabs. They were not, however, invented by that people, but were derived by them from Hindostan. The characters were originally the initial letters of the Sanskrit names for the nine digits, *one, two, three*, etc., but have undergone considerable changes of form. The cipher was originally a dot, used as a mere arbitrary sign to mark place or local value.

In the Roman notation, when any character is placed at the right hand of a larger numeral, its value is added to that of such numeral; as, VI, that is, V + I; XV, that is, X + V; MD, that is, M + D; and the like. I, X, and sometimes C, are also placed at the left hand of other and larger numerals, and when so situated their value is subtracted from that of such numerals; as, IV, that is, V − I; XC, that is C − X; and the like. Formerly the smaller figure was sometimes repeated in such a position, twice its value being in such cases subtracted from the larger; as, IIX, that is, X − II; XXC, that is, C − XX; and the like. Sometimes after the sign IↃ for D, the character Ↄ (called the *apostrophus*) was repeated one or more times, each repetition having the effect to multiply IↃ by ten; as, IↃↃ, 5,000; IↃↃↃ, 50,000; and the like. To represent numbers twice as great as these, C was repeated as many times before the stroke I, as the Ↄ was after it; as, CCIↃↃ, 10,000; CCCIↃↃↃ, 100,000; and the like. A horizontal line over a letter increases its value a thousand times; as, $\overline{\text{D}} = 500{,}000$. The origin of the Roman numeral characters is uncertain, and various explanations of them have been given. It is generally supposed that they were originally arbitrary signs, for which the letters most nearly resembling them were afterward substituted. They are now chiefly employed in dates, headings of chapters, upon the dials of timepieces, and the like. The most usual forms in the above list stand first; those that stand after these being rare forms, or such as are only occasionally used.

2. THE RELATIONS OF QUANTITIES.

\+ Plus; and; more; indicating addition; as, $a + b = c$; that is, a added to b makes a sum equal to c; $6 + 4 = 10$; used also to indicate that figures have been omitted from the end of a number, or that the latter is approximately exact; as, the square root of 2 is 1.4142135+.

− Minus; less; indicating subtraction; as, $a - b = c$; that is, a less or diminished by b is equal to c; $6 - 4 = 2$; used also to indicate that figures have been omitted from the end of a number, and that the last retained figure has been increased by unity; as, the square root of 2 is 1.414214−.

$\pm$, *or* $\mp$ Plus or minus; ambiguous; indicating that the number or quantity to which it is prefixed may have either of the signs + or −; as, the square root of $4a^2$ is $\pm 2a$.

× Multiplied by; times; into; as, $a \times b = ab$; $6 \times 4 = 24$.

☞ Multiplication is also often indicated by placing a dot between the factors, or by writing the latter, when not numerals, one after another without any sign; as, $a \times b \times c = a \,.\, b \,.\, c = abc$; $2 \times 3 \times 4 = 2 \,.\, 3 \,.\, 4 = 24$.

÷, or : Divided by; as, $a \div b$; that is, a divided by b; $6 \div 3 = 2$.

☞ Division is also very often indicated by writing the divisor under the dividend, with a line between them, or by writing the divisor after the dividend, with an oblique line between them; as, $\frac{a}{b}$; that is, a divided by b; $\frac{6}{3} = 2$; $\frac{3}{8}$ = three eighths.

$\perp$ Divided by; as, $a \perp b$; that is, a divided by b; $6 \perp 3 = 6 \div 3 = 2$. *Rare.*

= Is equal to; equals; as, $(a + b) \times c = ac + bc$; $6 + 2 = 8$.

$\fallingdotseq$ Is approximately equal to; as, $\pi \fallingdotseq 3\frac{1}{7}$.

$\neq$ Is not equal to; the contradictory of =; as $a \neq b$.

> Is greater than; as, $a > b$; that is, a is greater than b; $6 > 5$.

< Is less than; as, $a < b$; that is, a is less than b; $3 < 4$.

$\not<$ *or* $\not\geq$ Is not less than; the contradictory of <; as, $a \not< b$; that is, a is not less than b, or, a may be equal to, or greater than, b, but cannot be less than it.

$\not>$ *or* $\not\leq$ Is not greater than; the contradictory of >; as, $a \not> b$; that is, a is not greater than b, or, a may be equal to, or less than, b, but cannot be greater than it.

$\doteqdot$ Is equivalent to; applied to magnitudes or quantities which are equal in area or volume, but are not of the same form, or capable of superposition; as, $a^2 \doteqdot b\,c$; that is, the square whose side is a is equal to the rectangle whose sides are b and c. *Rare.*

$\cong$ Is congruent to; as, $38 \cong 59$ (modulus 7).

$\pitchfork$ Of the form of; as, $a \pitchfork (2n + 1)$; that is, the term a is of the form $2n + 1$; $17 \pitchfork (2 \times 8 + 1)$; that is, the odd number 17 is of the form $2 \times 8 + 1$. *Rare.*

$\not\pitchfork$ Is divisible by; as, $a \not\pitchfork b$; that is, b is an exact factor of a; $8 \not\pitchfork 2$. *Rare.*

$\sim$ The difference between; used to indicate the difference between two quantities without designating which is the greater; as, $a \sim b$; that is, the difference between a and b.

− : The difference between; the same as $\sim$. *Rare.*

$\propto$ Varies as; is proportional to; as, $a \propto b$; that is, a varies as b, or is dependent for its value upon b.

$\div$ Geometrical proportion; as, $\div\, a : b :: c : d$; that is, the geometrical proportion $a : b :: c : d$. *Rare.*

$\because$ Is to; the ratio of; As; equals; } used to indicate geometrical proportion; as, $a : b :: c : d$; that is, a is to b as c is to d; or, the ratio of a to b equals the ratio of c to d.

$\because$ Minus; the arithmetical ratio of; Equals; is equal to; } used to indicate arithmetical proportion; as, $a \cdot\cdot b :: c \cdot\cdot d$; that is, $a - b = c - d$. *Rare.*

∞ Indefinitely great; infinite; infinity; used to denote a quantity greater than any finite or assignable quantity.

0 Indefinitely small; infinitesimal; used to denote a quantity less than any assignable quantity, also, as a numeral, naught; nothing; zero.

$\lfloor\!\lfloor$ *or* $\llcorner$ The continued product of numbers from one upward; the factorial; as, $4\lfloor\!\lfloor = 4 \times 3 \times 2 \times 1 = \underline{|4}$.

$\therefore$ Therefore.

$\because$ Since, or because.

.... And so on.

$\equiv$ (*a*) Is identical with; as $(a + b)^2 \equiv a^2 + 2ab + b^2$. (*b*) Is congruent with. Cf. $\cong$ above.

$\Subset$ Is a part of.

$\backsim$ *or* $\backsim\!\!\backsim$ Is similar to.

$\angle$ Angle; the angle; as, $\angle$ ABC = $\angle$ DEF; that is, the angle ABC is equal to the angle DEF; less frequently written > or >.

☞ By some geometers, the angle between two lines, as a and b, is also indicated by placing one of the letters denoting the inclosing lines over the other; as, $\frac{a}{b}$; that is, the angle between the lines a and b; sin. $\frac{a}{b}$; that is, the sine of the angle between the lines a and b.

$\llcorner$ Right angle; the right angle; as, $\llcorner$ ABC; that is, the right angle ABC.

$\perp$ The perpendicular; perpendicular to; is perpendicular to; as, draw AB $\perp$ CD; that is, draw AB perpendicular to CD.

$\shortparallel$ Parallel; parallel to; is parallel to; as, AB $\shortparallel$ CD; that is, AB is parallel to CD.

$\underline{\wedge}$ Equiangular; is equiangular to; as, ABCD $\underline{\wedge}$ EFGH; that is, the figure ABCD is equiangular to the figure EFGH. *Rare.*

$\underline{\triangle}$ Equilateral; is equilateral to; as, ABC $\underline{\triangle}$ DEF; that is, the figure ABC is equilateral to the figure DEF. *Rare.*

○ Circle; circumference; 360°.

⌒ Arc of a circle; arc.

△ Triangle; the triangle; as, △ ABC = △ DEF; that is, the triangle ABC is equal to the triangle DEF.

□ Square; the square; as, □ ABCD; that is, the square ABCD.

□ Rectangle; the rectangle; as, □ ABCD = □ EFGH; that is, the rectangle ABCD equals the rectangle EFGH.

$\sqrt{}$, *or* $\sqrt{}$ Root, indicating, when used without a figure placed above it, the square root; as, $\sqrt{4} = 2$; $\sqrt{4a^2} = 2a$. This symbol is called the *radical sign*. To denote any other than the square root, a figure (called the *index*) expressing the degree of the required root, is placed above the sign; as, $\sqrt[3]{a}$, $\sqrt[5]{a}$, $\sqrt[10]{a}$, etc.; that is, the cube root, fifth root, tenth root, etc., of a.

☞ This sign is merely a cursive modification of the letter *r*, which was used as an abbreviation of the Latin word *radix*, root. The root of a quantity is also denoted by a fractional index at the right-hand side of the quantity and above it, the denominator of the index expressing the degree of the root; as, $a^{\frac{1}{2}}$, $a^{\frac{1}{3}}$, $a^{\frac{1}{5}}$; that is, the square, cube, and fifth roots of a, respectively.

——— Vinculum, *or* ( ) Parenthesis, [ ] Brackets, *or* { } Braces, } indicate that the quantities to which they are applied, or which are inclosed by them, are to be taken together; as, $x + y^2$, $2\,(a + b)$, $a \times (b + c[e + d])$.

f, *or* F Function; function of; as, $y = f(x)$; that is, y is, or equals, a function of x; or as, $y = f(x, z)$; that is, y is or equals a function of x and z.

☞ Various other letters or signs are frequently used by mathematicians to indicate functions; as, ϕ, ϕ', ψ, π, Γ, [ ], and the like. Some of these are used also without the parenthesis; as, $\phi\, x$, function of x.

d Differential; as, dx; that is, the differential of x.

δ Variation; as, δx; that is, the variation of x.

Δ Finite difference.

D Differential coefficient; derivative. The variable, with respect to which the differential coefficient is taken, is indicated by writing the letter designating it at the right hand below; as $\mathrm{D}_t\phi$; that is, the differential coefficient of ϕ with respect to t.

☞ The letters *d*, δ, Δ, D, and sometimes others, prefixed to quantities, are variously employed, by different mathematicians, to denote that the differentials, variations, finite differences, or differential coefficients of these quantities are to be taken; but the ordinary significations are those given above. An index is often placed at the right hand of *d*, to indicate the result of one or more repetitions of the process denoted by that sign; as, d^2x, d^3x, etc.; that is, the second, third, etc., differential of x, or the result of differentiating x two, three, etc., times.

. Fluxion; differential; as, $\dot{x}$; that is, in modern notation, dx; and also equivalent to $\frac{dx}{dt}$, where t represents time.

$\int$ Integral; integral of; indicating that the expression before which it is placed is to be integrated; as, $\int 2x dx = x^2$; that is, the integral of $2x dx$ is x^2. See INTEGRATION, 2.

☞ This sign is merely a modified form of S, which is itself the abbreviation of the Latin word *summa*, sum, the integral being the sum of the differentials. It is repeated to indicate that the operation of integration is to be performed twice, or three or more times, as $\iint$, $\iiint$, etc. For a number of times greater than three, an index is commonly written at the right hand above; as, $\int^m x dx^m$; that is, the mth integral, or the result of m integrations of $x dx^m$. The variable, with respect to which the integral is taken, is sometimes indicated by writing the letter designating it at the right hand below; as, $\int\!\phi$; that is, the integral of ϕ with respect to x.

$\int^a$ denotes that the integral is to be taken between the value b of the variable and its value a. $\int^a$ denotes that the integral ends at the value a of the variable, and $\int_b$ that it begins at the value b. These forms must not be confounded with the similar one indicating repeated integration, or with that indicating the integral with respect to a particular variable.

Σ Sum; algebraic sum; the sum of all terms such as: thus, when three quantities, a, b, and c, are spoken of, $\Sigma\, ab = ab + ac + bc$; that is, $\Sigma\, ab$ is the sum of all the terms that can be formed of a, b, and c of the same kind as ab: when Σ is used to indicate the sum or summation of finite differences, it has a sense somewhat like that of the symbol $\int$.

Π Product; the continued product of all terms such as; as when three quantities a, b, and c are spoken of, $\Pi\,(a + b) = (a + b)\,(b + c)\,(c + a)$; that is, $\Pi\,(a + b)$ is the product of all the terms formed of the same kind as $a + b$. The limits of the products to be taken are indicated as in the symbol $\int$ by figures or letters placed near the top or bottom of the symbol; as, $\prod_{2}^{4}\left(1 + \frac{1}{n}\right) = \left(1 + \frac{1}{2}\right)\left(1 + \frac{1}{3}\right)\left(1 + \frac{1}{4}\right)$.

(X) A symbol used in abbreviations of quantics whose terms have the same numerical coefficients as a corresponding expression formed by involution; as, $(a,b,c,d \,(\mathrm{X}\, x,y)^3$, which denotes the quantic $ax^3 + 3\,bx^2y + 3\,cxy^2 + dy^3$, the numerical coefficients of which are the same as those obtained by expanding $(x + y)^3$.

(X) A symbol for a quantic which has no numerical coefficients; as, $(a,b,c,d \,(\mathrm{X}\, x,y)^3$, which denotes the quantic $ax^3 + bx^2y + cxy^2 + dy^3$.

π The number 3.14159265+; the ratio of the circumference of a circle to its diameter, of a semicircle to its radius, and of the area of a circle to the square of its radius. In a circle whose radius is unity, it is equal to the semicircumference, and hence is used to designate an arc of 180°. In a circle whose diameter is unity, it is equal to the circumference, or an arc of 360°.

e, *or* ϵ The number 2.7182818+; the base of the Napierian system of logarithms.

$\mathfrak{d}$ The eccentricity of a conic section.

M The modulus of a system of logarithms; used especially for the modulus of the common system of logarithms, the base of which is 10. In this system it is equal to 0.4342944819+.

g The force of gravity. Its value for any latitude is expressed by the formula $g =$

32.1707*G* (1 — 0.00259 cos. 2 λ), in which λ is the latitude given, and 32.17076 (that is, 32.17076 feet per second) the value of *g* at the latitude of 45°.

° Degrees; as, 60°; that is, sixty degrees.

′ Minutes of arc; as, 30′; that is, thirty minutes.

″ Seconds of arc; as, 20″; that is, twenty seconds.

h Hours.

m Minutes.

s Seconds.

R° Radius of a circle in degrees of arc, equal to 57°.29578. *Rare.*

R′ Radius in minutes of arc, equal to 3437′.7468. *Rare.*

R″ Radius in seconds of arc, equal to 206264″.8. *Rare.*

′, ″, ‴, etc. Accents used to mark quantities of the same kind which are to be distinguished; as, a', a'', a''', etc., which are usually read *a* prime, *a* second, or *a* double prime, etc. In England these are often read *a* dash, *a* double dash, or *a* two dash, etc.

☞ When the number of the accents would be greater than three, the corresponding Roman numerals are used instead of them; as, a', a'', a''', a^{iv}, a^{v}, a^{vi}, etc. The accents are often written below also; as, $a_{,}$, $a_{,,}$, $a_{,,,}$, a_{iv}, a_{v}, etc. Figures, and also letters, are sometimes used for the same purpose; as, a^{1}, a^{2}, a^{m}, a^{n}, a_{0}, a_{2}, a_{3}, a_{m}, a_{x}, and the like.

^{1}, ^{2}, ^{3}, etc. Indices placed above and at the right hand of quantities to denote that they are raised to powers whose degree is indicated by the figure; as, a^{1}; that is, the first power of a; a^{2}, the square, or second power, of a; a^{3}, the cube, or third power, of a; and the like.

☞ These signs are also often used to indicate the repetition of an operation; as, $d^{2}x$, $d^{3}x$, $d^{4}x$, etc., indicating that the operation of differentiation has been performed upon x two, three, four, etc., times. As used to indicate powers, they are often preceded by the negative sign to indicate the reciprocal of the corresponding power, or an inverse operation; as, a^{-1}, a^{-2}, a^{-3}, a^{-4}, etc., which are respectively equivalent to $\frac{1}{a^{1}}$, $\frac{1}{a^{2}}$, $\frac{1}{a^{3}}$, $\frac{1}{a^{4}}$, etc.

sin. x. The sine of x; that is, of the arc represented by x. In the same manner cos. x, tan. x, cot. x, sec x, cosec. x, versin. x, and covers. x, denote respectively the cosine, tangent, cotangent, secant, cosecant, versed sine, and coversed sine of the arc represented by x.

sin.^{-1}x. The arc whose sine is x. In the same manner cos.^{-1}x, tan.^{-1}x, cot.^{-1}x, sec.^{-1}x, cosec.^{-1}x, versin.^{-1}x, and covers.^{-1}x, are used to denote respectively the arc whose cosine, tangent, cotangent, secant, cosecant, versed sine, or coversed sine is x.

☞ This sign must not be confounded with the negative index designating the reciprocal of a quantity, which would be applied to parentheses inclosing one of these expressions; as, $(\text{sin. } x)^{-1}$, which is equivalent to $\frac{1}{\text{sin. } x}$.

sinh. x. The hyperbolic sine of x.

cosh. x. The hyperbolic cosine of x.

V. MEDICAL.

ā ā (Gr. ἀνά.) Of each.

℞ (L. *Recipe.*) Take.

☞ This character is reputed to have been originally the same as ♃, the symbol of Jupiter, which was placed at the top of a formula to propitiate the king of the gods, that the compound might act favorably.

S. (L. *Signa.*) Mark; used in a prescription to indicate directions to be put on the medicine package.

APOTHECARIES' WEIGHTS.

℔ Pound.

ℨ Ounce; as, ℨ i, or ℨ j, one ounce; ℨ ss, half an ounce; ℨ iss or ℨ jss, one ounce and a half; ℨ ij, two ounces, etc.

ʒ Drachm; as, ʒ i, one drachm; ʒ ss, half a drachm; ʒ iss, one drachm and a half; ʒ ij, two drachms, etc.

℈ Scruple; as, ℈ i, one scruple; ℈ ss, half a scruple; ℈ iss, one scruple and a half; ℈ ij, two scruples, etc.

APOTHECARIES' MEASURES.

C (L. *Congius.*) Gallon.

O, or O (L. *Octarius.*) Pint.

ℨ Ounce. *f*ℨ Fluid ounce.

ʒ Drachm. *f*ʒ Fluid drachm.

♏ *or* ℿ Minim, *or* drop.

VI. METEOROLOGICAL.

Rain.

Snow.

Snow on ground

Drifting snow.

Floating ice crystals.

Hail.

Sleet.

Frostwork.

Glazed frost.

Silver thaw.

Ice storm.

Hoarfrost.

Dew.

Fog.

Damp fog, mist.

Ground fog.

Haze, dust haze.

Thunderstorm.

Thunder.

Sheet lightning.

Strong wind.

Solar corona.

Solar halo.

Lunar corona.

Lunar halo.

Rainbow.

Aurora.

Zodiacal light.

VII. MISCELLANEOUS.

&, &c, &c. And.

&c. (*Et cætera.*) And the rest; and so forth; and so on; and the like.

☞ The character & is a ligature combining the letters which compose the Latin word *Et*, and. In the "Old Style" &, these letters are distinctly visible; in the common Roman and Italic forms, they are much corrupted, but may still be recognized.

℟ Response; — used in Roman Catholic and some other service books.

℣ Versicle; — used in Roman Catholic and other service books to denote the part recited or sung by the priest, or person who presides at the office or prayers.

✳ A character used in Roman Catholic service books to divide each verse of a psalm into two parts, and show where the response begins.

✠ *or* + A sign of the cross used by the Pope, and by Roman Catholic bishops and archbishops, immediately before the subscription of their names. In Roman Catholic and some other service books, it is used in those places of the prayers and benediction where the sign of the cross is to be made.

℞ See LABARUM, also ☧.

➔ Broad Arrow; a British government mark, stamped, cut, or otherwise fixed, on solid materials used in the royal ships or dockyards, in order to prevent embezzlement of naval stores; also used by British customs officers.

×, *or* + A character customarily made by persons unable to write, when they are required to execute instruments of any kind, as deeds, affidavits, etc. The name of the party is added by some one who can write; as, *his* *John* × *Smith* *mark.*

B*χa* The acute bisectrix. *Opt. Min.*

B*χo* The obtuse bisectrix. *Opt. Min.*

μ Micron; magnetic permeability.

μμ Thousandth of a micron.

Φ Farad. *Elec.*

4to, *or* 4°. Quarto; four leaves, or eight pages, to a sheet.

8vo, *or* 8°. Octavo; eight leaves, or sixteen pages, to a sheet.

12mo, *or* 12°. Duodecimo; twelve leaves, or twenty-four pages, to a sheet.

16mo, *or* 16°. Sextodecimo; sixteen leaves, or thirty-two pages, to a sheet.

18mo, *or* 18°. Octodecimo; eighteen leaves, or thirty-six pages, to a sheet.

☞ Other sizes are 24mo, *or* 24° (Vigesimo-quarto), 32mo, *or* 32° (Trigesimo-secundo), 36mo, *or* 36° (Trigesimo-sexto), 48mo, *or* 48° (Quadrigesimo-octavo), 64mo, *or* 64° (Sexagesimo-quarto), 72mo, *or* 72° (Septuagesimo-secundo), 96mo, *or* 96° (Nonagesimo-sexto), 128mo, *or* 128° (Centesimo et vigesimo-octavo). These sizes are of rare occurrence, and are not commonly known by their Latin names, but are colloquially called twenty-four-mo, thirty-two-mo, etc., or twenty-fours, thirty-twos, etc.

7ber, September; 8ber, October; 9ber, November; 10ber, December.

♀ ♂ Male; — used in zoölogy.

♀ ♂ Female; — used in zoology.

< Derived from; — used in giving etymologies.

ch Takes and checks. *Chess.*

VIII. MONETARY AND COMMERCIAL.

$ Dollar, *or* Dollars; as, $1; $200.

¢ Cent, *or* Cents; as, 12 ¢; 33 ¢.

P Peso, *or* Pesos. *Philippines.*

/ Shilling, *or* Shillings; as, 1/6 = 1s. 6d.; 2/3 = 2s. 3d.

£ Pound, *or* Pounds (sterling); as, £1; £45.

£E Egyptian pound or pounds.

R Rupee, *or* Rupees. *India.*

℔ Pound, *or* Pounds (in weight); as, 1 ℔; 24 ℔.

@ At, *or* to; as, silk @ $2 per yd.; flour per bar. $8 @ $10.50.

℔ Per; as, sheep $4 ℔ head.

% a Per cent; as, discount 6% = $10.21. b Order of.

a/c Account; as, J. Smith in a/c with J. Jones.

B/L Bill of Lading.

c/o Care of.

L/c Letter of Credit.

c/f, *or* c/f Carried forward.

c/d, *or* c/d Carried down.

′ Foot, *or* Feet; as, a 40′ spar.

″ Inch, *or* Inches; as, a 10″ pipe.

× By, in dimensions; as, a room 10′ × 14′.

Number, *or* Numbered; as, # 60 thread.

✳ Used on stock tickers to denote that the quotation it follows is correct.

A 1 The designation of a first-class vessel in Lloyd's Register of British and Foreign Shipping; the letter denoting that the hull is well built and seaworthy, and the figure the efficient state of her rigging, anchors, cables, stores, etc. The figure 2 would imply that these were insufficient in quantity, or of an inferior quality. When a vessel has passed the age for the character A (four to fifteen years), it is registered A in red.

Æ The designation of a vessel of the third class, fit to convey perishable goods on short voyages only.

E The designation of a vessel fit for carrying on a voyage of any length such goods only as are not liable to sea damage.

I The designation of a vessel fit for carrying goods of the same sort on shorter voyages only.

M C Letters used to indicate that the boilers and machinery of a steam vessel have been inspected, and found to be in good order and safe working condition.

XX Ale of double strength.

XXX Ale of triple strength.

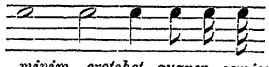
☞ The origin of the sign $ has been variously accounted for; but it is probably a modified figure 8, denoting a "piece of eight," *i. e.*, eight reals, — an old Spanish coin of the value of a dollar. It was in use long before the adoption of the Federal currency. The sign / is thought to have been originally a capital S (written thus, *ſ*), standing for the word *Shillings*. The character £, for Pounds sterling, is merely a capital *L* with a mark drawn across it, and represents the corresponding Latin word *Libræ*; while ℔, or pound weight, is formed from the first and third letters of the same word, connected by a similar mark. The sign @ is a graphic modification of the Latin word *ad*, meaning *at*, or *to*, or perhaps of its first letter only. ℔ is another form of *p*, the initial letter of the Latin word *per*, by. % is a cursive variation of ÷, the sign of division; thus, six per cent may be expressed by $\frac{6}{100}$, or 6 ÷ 100, or, without indicating the denominator, 6 ÷, whence, in rapid writing, 6%, or 6°/. The other characters need no explanation.

IX. MUSICAL.

Staff; the five lines with the four spaces between them, used to indicate the relative pitch of notes.

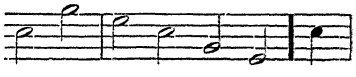
☞ When it is desired to indicate pitch higher or lower than that indicated by the staff, other lines, called *ledger lines*, are added above or below it. See LEDGER, in *Vocab.*

Bar.



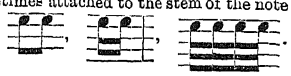
Double Bars

Bar; — the line drawn perpendicularly across the staff to separate the notes into measures.



Double bar; — used to mark the larger divisions of a piece; especially, in psalm or hymn tunes, songs, and the like, to mark the end of a verse or sentence.

Close; — used to indicate the end of a composition.



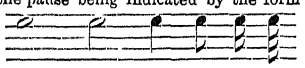
Notes, characters placed upon the lines or spaces of the staff, indicating, by their form and position, the length and pitch of the tones which they represent. The notes here given are called, respectively, *semibreve*, *minim*, *crotchet*, *quaver*, *semiquaver*, and *demisemiquaver* (or *whole note*, *half note*, *quarter*, *eighth*, *sixteenth*, etc.), each figure after the first indicating a tone of one half the length of that represented by the figure immediately preceding it. A dot after a note adds to it one half of the length of the same note without the dot; thus,  is equal to  ; and  is equal to 

The stems of the notes are turned either upward or downward, as is most convenient in placing them on the staff; thus, 

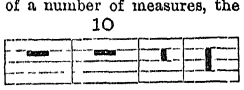
Breve. Long. Large

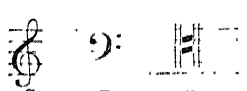
☞ Besides these, the *breve* was formerly used, it being twice the length of the semibreve. It still occurs in chorals, chants, etc. Two other characters, the *long*, equal to two breves, and the *large*, equal to two longs or four breves, and the longest note ever used, were employed in mediæval music. More than three strokes are sometimes attached to the stem of the note in very minute divisions. When two or more tailed notes come together, they are often connected by the tails or strokes; as,

☞ When many notes of the same denomination are to be used in immediate repetition, a single note of larger denomination is sometimes employed, with strokes placed over it, or written across its stem, to signify that it is to be divided into quavers, semiquavers, demisemiquavers, etc., respectively, as in the following examples, where *w.* signifies *written*, and *p.*, *performed*.



These marks are also used to direct the repetition of groups of notes preceding them in the same measure; as,





3, 5, 7, etc., are marks placed over groups of notes, and used to indicate that 3, 5, 7, etc., notes (all equal) are to be performed in the time of 2, 4, 6, etc., notes of the same kind respectively; as,  and  , which are performed in the same time as  and  respectively.

Rests; — characters indicating silence, or a pause in the performance, the length of the pause being indicated by the form of the character. Thus, the characters here given, taken in their order, indicate pauses of the same length as the following notes respectively.

☞ More than three hooks or strokes may be attached to the stems of the rests, to indicate shorter pauses corresponding to the shorter notes. Rests may be lengthened in the same manner as notes, by placing a dot or two dots after them. A rest, or pause, of a whole measure, is indicated by the mark — placed upon the fourth line, the figure 1 often being written above; and to express a rest of a number of measures, the same mark is used, over it being written the number of measures included in the rest or pause. Two old long rests still sometimes occur; a short, and a longer heavy vertical mark, indicating rests respectively of two and of four measures. The following are examples:

G Clef. F Clef. C Clef.

Clefs; — characters placed upon the staff to determine the pitch indicated by its lines and spaces. They were originally written smaller, and placed upon a line or space, and they respectively designate the second line as indicating *g'*; the fourth line as indicating f; and the line or space inclosed as indicating *c'*. See CLEF and PITCH in *Vocab.*

♭ Flat — used to indicate that the note before which it is placed is to be sounded lower by a half step than the same note without the sign. When placed on a line or space at the beginning of a piece, it signifies that every note on such line or space is to be sounded lower by a half step than in the natural scale.

𝄫 Double flat; — used to lower a note, already flatted, a half step.

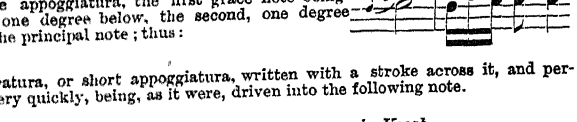
Single flat, as used after a double flat.

♯ Sharp; — used to indicate that the note before which it is placed is to be sounded higher by a half step than the same note without it. It is applied in the same way as the flat.

☞ The sharps or flats placed at the beginning of a piece to determine its key or tonality are called the *signature* of the piece. See SIGNATURE, in *Vocab.*

𝄪 Double sharp; — used to raise a note, already sharped, a half step.

Single sharp, as used after a double sharp.



♮ Natural; — used to contradict, or counteract the effect of, a previous ♯ or ♭, either expressed or implied.

 , *or* 
Repeat; — placed at the end of a passage to denote that it is to be performed a second time. Sometimes the dots are placed also at the beginning of the passage.

, *or*
Characters marking common time, the former indicating two minims, the latter four crotchets in a bar. also marks *alla breve* time, which is a little faster.

𝄋 Sign; — used to mark the point to which reference is made, or from which the repetition of a passage is to begin.

, *or* 
Long appoggiatura, or leaning note; an embellishment consisting of a grace note placed before a principal note, one step or half step either above or below the latter, and taking its time value from that of the principal note; as,

Double appoggiatura, the first grace note being written one degree below, the second, one degree above, the principal note; thus:

Acciaccatura, or short appoggiatura, written with a stroke across it, and performed very quickly, being, as it were, driven into the following note.

Pralltriller, or inverted mordent. See PRALLTRILLER, in *Vocab.*

∾ Turn; — indicating an embellishment consisting of the note over which the character is placed, with two auxiliary tones, performed generally as a triplet; as,

☞ When the note above is flatted, the character is written ; when the note below is sharped, it is written . It may also be written with the natural sign [♮] in place of either of these, when the corresponding note should have that sign placed before it.

Inverted turn, consisting of the same notes as the turn, performed in reverse order; as,

tr Trill; shake; — indicating that the note to which it belongs is to be rapidly alternated with the note above or below. A waving line (~~~~~) or line of dots (.....) is often added after it, indicating how far the shake is to be extended; as,

See SHAKE, *n.*, 4 a, in *Vocab.*

Arpeggio; — used in piano music, to denote that the notes of the chord before which it is written are not to be struck simultaneously, but in quick succession upward.

Pause, or hold; — indicating that the note or rest over or under which it is placed is to be prolonged at the pleasure of the performer. It is sometimes placed over the *close*, to denote that the strain which it ends forms the conclusion of the piece; as,

Crescendo; — indicating that the volume of sound is to be gradually increased.

Decrescendo; diminuendo; — indicating that the volume of sound is to be gradually diminished.

Swell; — indicating a gradual increase, or crescendo, followed by a gradual decrease, or decrescendo.

indicates a gradual decrease followed by a gradual increase of sound.

Sforzando, *or* Forzando; — indicating that the note or chord over or under which it is placed is to be struck with force and then immediately diminished in loudness; — written also ∧, *or* ∨, or indicated by the abbreviation *fz*, *sf*, *rf*, or *rfz*.

Pressure tone; — indicating that a sound begun soft is to be instantly increased to a loud tone.

Staccato; — placed over or under a note, to indicate that it is to be struck with force, and performed in a short, sharp, emphatic manner.

indicates that the note is to be performed in a manner similar to the staccato, but not so emphatically and sharply.

☞ To indicate a still lower degree of emphasis and distinctness the slur is sometimes written over the dots; as,

, *or* Slur; — the sign of legato, indicating that the notes over or under which it is placed are to be performed in a smooth, connected manner. It is also used as the tie to connect two or more notes of the same pitch which are to be sung to one syllable, or to be united into one long note.

{ Brace; — used to connect those staffs of a composition or score which are to be performed together.

Direct; — formerly placed on that line or space at the end of a staff which is occupied by the first note of the following staff, to indicate the position of the latter to the performer.

♩ = 80, 𝅗𝅥 = 60, etc. A notation used in indicating the proper tempo of a piece. Thus, ♩ = 80, 𝅗𝅥 = 60, etc., denote respectively that 80 crotchets or quarter notes, and 60 minims or half notes, are to be performed in one minute; or that each note of the kind indicated is performed in the time of one vibration of the pendulum of a metronome when the nut is set at 80, 60, etc., respectively.

✱, ⊕, *or* ⏚ Characters used in music for the piano, directing the use of the pedals. The last two are now rare.

⁎, *or* ✕ A mark used after the preceding, and directing a discontinuance of the use of the pedals.

□, *or* ⋀ Characters sometimes used in music for the violin, the former to indicate a *down* bow, the latter an *up* bow.

△ Indicates a phrase, or incomplete musical idea.

⊐ Indicates a section, or complete but not independent idea.

○ Indicates a period, or complete and independent musical sentence.

f Forte; with a loud sound.

ff Fortissimo; with a sound louder than *forte*.

☞ *fff* indicates the loudest the voice or instrument is capable of producing.

fp Forte, piano. Same as *fz*.

fz Forzando. Same as >, ∧, ∨, or *sf*.

m Mezzo; with a sound of medium strength or loudness.

mf Mezzo forte; with a moderately loud sound.

p Piano; with a soft or low sound.

pp Pianissimo; with a sound softer than *piano*, but firm and audible.

☞ *ppp* is sometimes used to denote the extreme of softness in sound.

rf, or *rfz* Rinforzando. Same as >, *fz*, or *sf*.

sf Sforzando. See > and *fs*.

$\frac{6}{5}$, $\frac{6}{4}$, $\frac{7}{2}$, etc., etc. Figures beneath or above the notes in a bass part, indicating the harmony in the higher parts; — called variously *figured bass*, *thorough bass*, and *basso continuo*. See THOROUGH-BASS, in *Vocab.*

X. TYPOGRAPHICAL.

1. MARKS OF PUNCTUATION.

, Comma.
; Semicolon.
: Colon.
. Period.
— Dash.
? Interrogation.
! Exclamation.
( ) Parentheses.
[ ] Brackets, *or* Crotchets.
' Apostrophe.
- Hyphen.
´ Acute Accent.
` Grave Accent.
^ Broad *or* Circumflex Accent.
~ *or* ∩ Circumflex, *or* Tilde.
¯ Long Accent, *or* Macron.
˘ Short, *or* Breve.
¨ Diæresis.
¸ (ç) Cedilla.
‸ Caret.
" " Quotation Marks.
}, *or* } Brace.
* * * Ellipsis.
. . . Ellipsis; *also*, Leaders.
—— Ellipsis.
* Asterisk.
† Dagger, *or* Obelisk.
‡ Double Dagger.
§ Section.
‖ Parallels.
¶ Paragraph.
☞ Index.
⁂, *or* ⁂ Asterism.

☞ For an explanation of the various purposes for which these marks or points are used, see their names in the *Vocab.* The note of interrogation is said by Bilderdijk to

have been formed from the first and last letters of the Latin word *Quæstio*, question, placed one over the other; thus, $\frac{Q}{o}$. According to the same authority, the note of exclamation was formed from the Latin word *Io*, joy, written vertically; thus, $\frac{I}{o}$. The circumflex accent (ˆ, ⌢, *or* ~) is formed by joining the grave and the acute. The cedilla (¸) was originally the same as the letter *z*, and was written, in Spanish and French, between the letter *c* and a following *a*, *o*, or *u*, to preserve the *c* in its soft sound. Afterward it was placed under the *c*, and acquired the character of a mere diacritical point. The section mark (§) is said by some to have been formed from the initial letters (*ſſ*) of the Latin words *signum sectionis*, meaning *sign of the section;* but others assert that it is a corruption of a Greek π, the first letter of the word παράγραφος, which means *a marginal line* or *stroke*. The character ¶ is a modification of a capital P (the initial of *paragraph*); the letter being reversed, and the black part being made white, and the white part black, for the sake of distinctiveness. The other characters are all purely arbitrary.

2. PROOF READERS' MARKS.

ℌ, *or* ℑ (L. *dele.*) Dele, *or* Delete; take out, or expunge.
9 *or* Turn a reversed letter.
A space, or more space, as between words, letters, or lines.
⌢ *or* ⌣ Less space, or no space, between words or letters.
⌊ *or* ⌋ Carry a word farther to the left or to the right.
□ Em quad space; also, indent.
⌐ Elevate a letter, word, or character that is sunk below the proper level.
⌙ Sink or depress a letter, word, or character that is raised above the proper level.
| Shows that a portion of a paragraph projects laterally beyond the rest.
⊥ Directs attention to a quadrat or space which improperly appears.
×, *or* + Directs attention to a broken or imperfect type.
[Bring a word or words to the beginning of a line; also, make a new paragraph.
═ *or* /// *or* \ \ \ Straighten (a crooked line or lines).
⌢ Print as a diphthong, ligature, or single character; thus, æ, fl (*i. e.*, print æ, fl).
¶ Make a new paragraph.
— Put in Italic, also, change according to the mark in the margin, as from Italic to Roman, or from Roman to Italic.
= Put in small capitals.
≡ Put in capitals.
....Restore or retain words which have been crossed out; *stet* being usually written in the margin.

☞ The other marks are self-explanatory; but the following *abbreviations*, used in correcting proof sheets, require explanation: —

wf. Wrong font; — used when a character is of a wrong size or style.
tr. Transpose.
l. c. Lower case; that is, put in small, or common, letters a word or letter that has been printed in capitals or small capitals.
s. caps., or *sm. c.* Put in small capitals.
Qu., *Qy.*, or ? Query; Is this right?
out, s. c. Words are omitted, or are wanting, see copy.

SPECIMEN OF A CORRECTED PROOF-SHEET.

THE CROWNING OF PETRARCH.

Nothing can be conceived more affecting or noble than that ceremony. The superb palaces and ~~and~~ porticos by which had rolled the ivory chariots of Marius and Cæsar had long mouldered into dust. The laureled fasces, the golden eagles, the shouting Legions, the captives, and the [pictured cities were indeed wanting to his victorious pro cession. The sceptre had passed away from Rome. But she still retained the influence mightier of an intellectual empire, and was now to confer the ~~prouder~~ reward of an intellectual [triumph. To [the man who [had [extended the dominion of her ancient language — who had erected the trophies of philosophy and [imagination in the haunts of ignorance and ferocity, whose ~~captions~~ were the hearts of admiring nations enchained by the influence of his song — whose spoils were the *treasures* of ancient genius — the Eternal City offered the glorious and just tribute of her gratitude.

Amid the ruined monuments of ancient, and the infant erections of modern art, he who had restored the broken link between the two ages of human civilization was crowned with the wreath which he had deserved from the moderns who owed to him their refinement, — from the ancients who owed to him their fame

Never was a coronation so august witnessed by westminster or Rheims.
